

MUHAMMED ABBAS VM

MERN Stack Developer

abbasakk398@gmail.com • +91-6235387198 • [LinkedIn](#) • [GitHub](#) • [LeetCode](#) • [Portfolio](#)

Profile Summary

Full-Stack Web Developer specializing in the MERN Stack with hands-on experience building and deploying web applications using JavaScript, TypeScript, React, Node.js, Express.js, and MongoDB. Currently working as a Software Developer Intern at Zacser Technologies, contributing to a production-level web application. Experienced in RESTful API development, authentication systems, real-time features, and modern development workflows. Built impactful projects including an AI-based skin disease detection system integrating machine learning with a MERN stack. Familiar with Docker, AWS, and server management. Proficient in Git/GitHub, responsive web design, Data Structures and Algorithms, and core software engineering principles. Fast learner with a self-driven mindset and strong problem-solving skills.

Experience

Software Developer Intern | Zacser Technologies

MAY 2025 – Present

- Developed and maintained frontend features for a production-level web application using React.js and TypeScript, improving UI responsiveness and code maintainability.
- Integrated REST APIs with the frontend to enable dynamic data handling and real-time UI updates.
- Identified and resolved bugs in existing modules, improving application stability and overall user experience.
- Collaborated with cross-functional teams using Git and GitHub, following Agile development practices.
- Participated in code reviews and testing cycles to maintain code quality and adherence to Clean Architecture and SOLID principles.
- Assisted with deployment processes and provided production support for live application releases.

Projects

AI-Based Skin Disease Detection System | React.js, Node.js, Express.js, MongoDB, Python (ML), REST APIs

- Developed a full-stack MERN application integrated with a Python-based AI model to detect skin diseases from user-uploaded images.
- Built RESTful APIs using Node.js and Express.js for image upload handling and ML prediction requests.
- Integrated a machine learning classification model for disease detection and automated result generation.
- Designed a responsive React.js frontend for real-time prediction display, ensuring cross-device compatibility.
- Optimized backend performance and implemented secure data handling throughout the application.

NexaBid – Real-Time Bidding Platform | Node.js, Express.js, MongoDB, Socket.io, JWT, Bootstrap

- Developed a full-stack real-time auction platform with live bidding updates and chat using Socket.io.
- Designed RESTful APIs for bidding workflows, user management, and transaction handling.
- Implemented secure authentication using JWT tokens with CSRF protection and role-based access control.
- Improved system reliability through automated testing with Jest and Cypress.

Responsive Website Clones | HTML5, CSS3, JavaScript

- Built pixel-perfect responsive UI clones with cross-device compatibility and consistent layouts across screen sizes.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, Python (Basic)
Libraries & Frameworks	React.js, Redux, Node.js, Express.js, EJS, Bootstrap, Tailwind CSS, Socket.io
Databases	MongoDB (Mongoose, Aggregation, Transactions), PostgreSQL, MongoDB Atlas
Cloud & Deployment	AWS (EC2, S3), Nginx, Vercel, PM2, Cloudinary, Docker, GitHub Hosting
Tools & Platforms	Git, GitHub, Postman, VS Code, Payment Gateway Integration, Google Authentication
Modern Tech	TypeScript, Full-stack Development (Frontend, Backend, Database)
Concepts	Clean Architecture, SOLID Principles, DSA, REST APIs, MVC Architecture, Responsive Design
APIs & Auth	RESTful API Development, JWT Authentication, Session-based Authentication, CSRF Protection

Education

MERN Stack Development — Brototype

2025 – 2026 | Kochi, Kerala

Higher Secondary Education (HSE) — Board of Higher Secondary Examination, Kerala

Soft Skills

- Strong communication & presentation skills — confidently present projects to clients; public speaking with zero stage fear.
- Report writing & documentation — proficient in preparing clear, structured, and professional technical documentation.
- Creativity & flexibility — innovative problem-solving and adaptability to changing technical requirements.
- Teamwork & leadership — experienced in group discussions, splitting tasks, guiding team members, and decision-making.
- Time management & organizational skills — ability to prioritize tasks, meet deadlines, and coordinate multiple projects.
- Problem-solving skills — strong analytical thinking with ability to design effective solutions under evolving challenges.

Data Structures & Algorithms

- Strong understanding of Arrays, Linked Lists, Stacks, Queues, Hash Tables, and Trees.
- Proficient in Searching, Sorting, Recursion, Divide & Conquer, and Hashing techniques.
- Solid knowledge of time and space complexity (Big-O Notation).
- Active problem-solver on LeetCode.

Languages

English (Fluent) • Malayalam (Native) • Tamil (Basic) • Hindi (Basic)
