PROFESSIONAL SUMMARY

MERN Stack & React Native Developer with hands-on experience building, testing, and deploying scalable full-stack web and crossplatform mobile applications using JavaScript (ES6+), TypeScript, React.js, React Native, Node.js, Express.js, and MongoDB. Skilled in designing and optimizing RESTful APIs, database architecture, and secure JWT-based authentication for production-grade applications. Experienced in integrating third-party APIs, building responsive and reusable UI components with Redux and Context API, and collaborating with UI/UX designers, QA engineers, and product teams in Agile environments. Proficient with Git/GitHub, Docker, AWS (EC2, S3), Nginx, PM2, and CI/CD-driven deployment workflows, with working knowledge of PostgreSQL and testing frameworks including Jest and Cypress. Strong foundation in Data Structures & Algorithms, web security, and performance optimization, with a proven ability to write clean, well-documented, and maintainable code suited to fast-paced product and startup environments.

PROFESSIONAL EXPERIENCE

Software Developer Intern — Zacser business llp

May 2026 – July 2026

- Developed and maintained production-grade full-stack web applications using React.js, TypeScript, Node.js, Express.js, and MongoDB, improving UI responsiveness and code maintainability.
- Developed cross-platform mobile applications using React Native and TypeScript, building reusable UI components shared across web and mobile platforms.
- Designed and integrated secure RESTful APIs into React.js and React Native applications to enable dynamic data handling and real-time updates.
- Implemented JWT-based authentication and secure API communication, strengthening application-level web security.
- Worked with MongoDB to design and optimize database schemas and queries, improving backend API performance.
- Identified, debugged, and resolved issues across existing modules, improving application stability and overall user experience.
- Collaborated closely with UI/UX designers, QA engineers, and backend developers within Agile sprints, participating in sprint planning and code reviews.
- Used Git and GitHub for version control, following Clean Architecture and SOLID principles to write clean, reusable, and maintainable code.
- Assisted with application deployment and DevOps workflows using Docker, AWS EC2, Nginx, PM2, and Vercel, and supported CI/CD-driven release processes.
- Contributed to responsive, mobile-first web design and cross-device application development.

PROJECTS

AI-Based Skin Disease Detection System

React.js, Node.js, Express.js, MongoDB, Python, REST APIs

- Built a full-stack MERN application integrated with a Python-based machine learning model to detect skin diseases from user-uploaded images.
- Developed secure RESTful APIs in Node.js and Express.js for image upload handling and ML prediction requests.
- Designed a responsive React.js frontend for real-time prediction display, ensuring cross-device compatibility.
- Optimized backend performance and implemented secure data-handling practices throughout the application.

NexaBid — Real-Time Bidding Platform

Node.js, Express.js, MongoDB, Socket.io, JWT, Bootstrap, Jest, Cypress

- Built a full-stack real-time auction platform with live bidding updates and chat using Socket.io, supporting transaction-driven user workflows.
- Designed and optimized RESTful APIs and MongoDB schemas for bidding workflows, user management, and transaction handling.
- Implemented secure JWT-based authentication with CSRF protection and role-based access control to safeguard sensitive user data.
- Improved system reliability and code quality through automated testing with Jest and Cypress.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python (Basic)

Frontend: React.js, React Native, Redux, Context API, Bootstrap, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, RESTful API Development, JWT Authentication, OAuth, Socket.io

Databases: MongoDB, MongoDB Atlas, Mongoose, Database Design & Optimization, PostgreSQL

Cloud & DevOps: Docker, CI/CD, AWS (EC2, S3), Nginx, PM2, Vercel, Cloudinary

Testing: Jest, Cypress

Tools: Git, GitHub, Postman, VS Code

Concepts: MVC & Clean Architecture, SOLID Principles, Web Security, Performance Optimization, Scalable Web Applications, Data Structures & Algorithms, Agile Development

EDUCATION

MERN Stack Development — Brotoype, Kochi, Kerala (2025 – 2026)

Higher Secondary Education (HSE) — Board of Higher Secondary Examination, Kerala

ADDITIONAL INFORMATION

Languages Spoken: English (Fluent), Malayalam (Native), Tamil (Basic), Hindi (Basic)
